# Sovereign Tech Fund

## Join the Bug Resilience Program

Application name

I understand that in order to receive notifications about the status of my application, my applicant profile must be subscribed to "broadcast emails" and "notification emails."

I acknowledge: All code and documentation to be supported must be licensed such that it may be freely reusable, changeable and redistributable

Project title

May be identical with application name

Link to project website (optional)

Link to project repository (optional)

If your technology has more than one public repository link to the main one here.

Where is your open source technology project being used (describe all user bases)?

300 words

Please detail all known applications and user groups of your project. This includes industries, specific organizations, educational, journalistic or other public interest sectors, and key groups of users. If your project has diverse use cases or reaches different demographics, include that information here.

Why do you consider your open source technology project to be relevant and critical?

300 words

Explain the criticality of your project in its current use cases. Discuss what makes it crucial to its users and the potential consequences if it were to malfunction or cease operations. Consider societal, economic, and long term impacts.

How does your open source technology benefit the public interest?

300 words

Beyond the above, describe how your project serves or could serve the interests of the public and various societal groups. Consider general benefits e.g. improving access, enhancing communication, or improving public and private digital services. Mention specific examples or potential scenarios where your technology makes a difference in everyday life. This could also include indirect benefits such as contributing to public exchange of knowledge and information, fostering innovation and other economic benefits, or enhancing environmental sustainability.

Please describe the history and state of development of your open source technology

500 words

You can include information like key maintainers, Governance, Release/update cycle, development history, critical dependencies of the technology, and other technologies that have this technology as a critical dependency, or any technical debt assessments.

Which BRP services are you interested in?

Direct Contributions

Bug Bounty Program

Secure Code Audits

Please note that services are provided on a first come first serve basis.

- Direct Contributions will be provided by Neighborhoodie GmbH and entails direct code and non-code contributions, such as triaging, sorting and fixing known issues, supporting projects with additional coding capacity, re-engineering/re-coding/refactoring or removing code, improving documentation and contributor onboarding material, as well as help implementing best practices or standards for maintainability.
- Bug Bounty Program is provided through our partner YesWeHack, who will assist with the setup of the program on their platform and bug report triage.
- Secure Code Audits will be provided through our partner OSTIF. Please note we have a limited capacity for this service so there may be a significant waiting time.

More information on our website: [bugresilience.de](https://bugresilience.de)

Describe why your project needs those services? (optional)

300 words

This question is optional. Please note that if accepted into the program, there will be a scoping process to determine the appropriate and specific scope of services your project will receive. The answer you provide here can help us frame that future conversation but is not binding.
